

BUDDY.. *update Feb 2023*

This boy was found hiding on the screened in porch of a stranger; he pushed his way inside the screen door due to the frigid temperatures outside in December. Neighbors stated he had been wandering the neighborhood since November. His current caretaker made flyers with his picture and information and posted it around town for multiple weeks - no one came forward. She is providing him with a home until a foster or adopter can be found; however, she works long hours every day and cannot provide the necessary time for him. BUDDY is NOW neutered, current on vaccines, hw test, and REALLY needs a new home !!!

Here are a few details about BUDDY:

Male Staffordshire mix, 6 - 7 yrs of age, approx 80lbs

NEUTERED, and fully vaccinated, heartworm negative

Appears very healthy, has some itchy skin - could be due to food allergies

(Terriers can typically be allergic to food with ckn OR beef; we recommend turkey based food)

Does great interacting with all adults. **LOVES EVERYONE!**

He has not been around children; given his size adults only recommended

Gets along with spayed female dogs, approx 8yrs of age similar size

He is not currently crated *(current caretaker does not crate)*

Energy level is low to high - requires daily exercise

Has high prey drive for squirrels

Cats and small dogs not tested; not recommended due to prey drive

Protective of home and yard - fenced yard recommended

Knows a few commands: stop, sit, paw, down and here(recall)

Buddy does not share any toy and is fed in a separate room
for safety reasons....neither dog shares toys
